BASIC HINTS on SALES PROSPECTING AT THE BOOTH

- Wear standard business dress and older, more comfortable shoes.
- Arrive at the booth 15 minutes early each day.
- Wear your name badge on the right so people catch your name.
- Speak slowly and clearly. Halls are noisy.
- Don't carry on extensive conversations with fellow staff members.
- Don't smoke, eat or drink, even when invited by a customer.
- Greet people at the edge of the aisle; not back in the booth. Don't sit, appear "ready to help".
- Introduce yourself and ask a leading question like: "What do you do?" Do you have any special purpose for attending the show?"
- Never start a conversation with, "Can I help you?"
- Use the first moment to "qualify", then decide how to proceed.
- Describe what you are offering with a tie-in to your prospect's interests, in a very few moments - a summary.
- If a prospect complains, move that person out of the booth to finish the conversation.
- Remain polite & professional, no half-fellow-well-met approach. You must control the contact and know when to end it.
- Ask about buying interest within five minutes like: "Are you interested in this?" "Should we meet later back in your office?" "Do you think what we have fits with your needs?"
- Try to schedule appointments with current customers for times when the show floor will likely be quiet. Save busy hours for prospecting.
- Schedule a short post day meeting to clean things up for the day.
- Try to limit a day's work at the booth for prospecting for four hours. Save the rest for current customers and learning.
- Do paperwork, leads or orders, right away. Write clear.

FARMERS... REVEAL VIRTUES OF FARM SHOWS, EXHIBITS

Business-minded growers value shows as a comparison shopping tool

by Willie Vogt

Farm shows have been around since the first enterprising dealers got together at the county fair to show off something new. But today, the show business is big business, and exhibitors are seeking ways to make each dollar invested do more work.

While exhibitor evaluation involves reviewing the attributes of individual shows, what do farmers think of farm shows? And what must a farm show have so farmers get value out of a trip away from the farm - especially if the show overlaps harvest?

Farm shows remain worthwhile to growers. And as equipment dealerships become fewer and farther between, producers need a way to do some one-stop shopping. When buying time comes, they don't have time to travel 40 miles on way and 60 miles another to compare tractors, drills or whatever else might be on the buying list.

Farmers like to know what to expect. Most of all, they want a good mix of exhibitors displaying something valuable to help them make buying decisions.

PLANNING AHEAD. "I always have a plan when I go to a show," says Ernest Nunez, a Dade City, Fla., producer. "When I go to a show, there's always something I need. I have a reason for going."

Nunez annually attends the Sunbelt Agricultural Exposition in Moultrie, Ga., and the Swine Expo. His diversified operation includes a confinement swine operation, feed mill, beef cattle, citrus groves and a vertically integrated alligator production facility.

With his diversified operation, Nunez takes a highly organized approach to farm show shopping. Before attending a show, he sets priorities - dividing what he wants to see into four categories:

- Products of primary interest to be purchased for the farm that year.
- Secondary products that relate to farm management and might improve his operation.
- Products or services he might be interested in the future. For example, if a remodeling project is planned for the future, Nunez will do some initial research on products available to begin getting a handle on features, benefits and costs involved.
- Anything that catches his eye. These would be products that are not critical to the operation but might fit what he does. Or these products would be for the

family's use.

"The first thing I do at a show is get the show literature or map. I need to know where the manufacturers are located so I can hit those I need to see first," he says. "If I have two or three days at the show, I'll mark out those primary exhibitors and make sure I see them as I walk the whole show. If I'm only there for the day, these are the booths I visit first."

SHOW TURN-OFFS. Exhibitors do plenty to get farmers inside the tent. Sometimes they do too much. "One thing I don't like is a pushy salesperson standing in the aisle and dragging you into the booth," says Bill Kirklink who farms near Franklin, Ind.

Kirklink likes farm shows for comparison shopping, and does he shop. "We have two Deere tractors, one Case, one Versatile and a Gleaner combine. We're not one color here. When I buy equipment, I look for a good price, features and the kind of dealership I'm working with," he notes.

Farming with his brother, Jud Vaught, Kirklink crops 1,400 acres of corn and soybeans. And he's constantly on the lookout for innovations that make doing his job easier. "I get drawn into an exhibit by something that catches my eye," he notes. "For instance, the first time I saw Red Ball Monitors they were operating in a booth. I enjoyed being able to see them working."

Red Ball Monitors alert a grower if a sprayer line is clogged when spraying fields.

Shoppers looking for innovations need to see - from the aisle - what makes a product unique. "We spend a lot of time in the shortline buildings looking for new stuff," Kirklink says.

EASY ACCESS IS KEY. "When I go to a show, I seek new ideas or answers to my questions," says Jim Facemire. "For instance, we looked at no-till bean drills and compared them. I bought a new Tye drill this year after seeing it at shows."

Working the show as a visitor, Facemire asks questions of representatives and expects to find the technical information he needs. But what else draws him into a booth?

- An active demonstration in the booth showing the product at work.
- A catchy display that tells the product story.
- People standing in the booth, on hand, ready to answer questions.

· A crowd. Facemire says if there's a crowd at a booth, he'll stop to see what's going on.

He bypasses booths where the sales team is too aggressive. (Visitors apparently want to browse unhindered and ask questions when they're ready)

FARM SHOW VALUE. Good news for exhibitors is that farmers report companies are using sound follow-up after the show. Nunez notes he always gets follow-up contacts from his show visits, and that's helpful for making buying decisions.

Farmers are geared toward seeing and touching before buying.

However, sometimes the follow-up is more ad-related than growers like. "Some companies just send you advertising stuff after the shows," Facemire says. "I don't fill out too many cards at shows - only for products I want to find out more about. And I would like more technical information about the product."

The farm show is an important shopping tool, allowing a producer to see every make of a specific type of equipment in one day. To compare features for better buying. To eliminate the need to drive long distances at buying time.

The equipment industry has talked about reducing dealer inventories for years. The goal is to keep in-field inventories down and build only to solid orders. The hands-on nature of farming, however, has created a customer group geared toward seeing and touching before buying.

A well-designed show can fill two roles: 1) help reduce field inventories by giving growers a look at the full line and 2) save farmers time by putting all makes within walking distance of each other.

"I couldn't get along without farm shows," Nunez says. "They're the bet place to go when I need products for my operation."

IN SHOW COMPETITION. Sometimes a show includes seminars for visitors. Do the seminars compete for show time? Are the seminars in the same building, or do visitors have to make a special effort to get to the show? Exhibitors don't like competition for visitor time. And if a seminar is at a separate location, the competition is almost too tough.

DEMONSTRATIONS OR ENTERTAINMENT

REGULATION:

Do not place your demonstration on the aisle line of your exhibit if you expect many people to congregate at one time. Leave space within your own exhibit area to absorb the majority of the crowd. Should spectators interfere with the normal traffic flow in the aisle or overflow into the exhibits of your neighbors on each side or across the aisle, the Show Management will have no alternative but to request that you limit or eliminate the presentation.

SOUND:

Police your own booth to be sure the noise level from any demonstrations or sound systems is kept to a minimum and does not interfere with others. Remember the use of sound systems or equipment producing sound is an exception to the rule, not a right. Show Management reserves the right to determine at which point sound constitutes interference with others and must be discontinued.

INTENT:

The aisles are the property of all the exhibitors; therefore each exhibitor has the responsibility to assure proper flow of traffic through the entire show. When large crowds gather to watch a demonstration or entertainment and interfere with the flow of traffic down aisles or create excessive crowds in neighboring booths, this is an infringement on the other exhibitors' rights. Aisles must not be obstructed at any time.
